Thank you for purchasing our equipment. Please read this manual carefully and heed the safety warnings and instructions before installing, using or repairing the equipment. This will ensure not only the protection of persons, but also the long life of the equipment.

DESCRIPTION OF EQUIPMENT

BASIC INFORMATION

- Manual time setting
- Calendar to 2099
- Setting the date
- Temperature units in °C/°F
- Optional time display 12/24h
- Development of temperature and humidity
- Low battery indicator
- Temperature measurement
    - Internal temperature measurement range: -9.9°C (14.2°F) ~ 50°C (122.0°F)
    - Outdoor temperature measurement range: -40°C (-40°F) ~ 70°C (158°F)
- Moisture measurement
    - Indoor humidity measurement range: 20%RH ~ 95%RH
    - Outdoor humidity measurement range: 20%RH ~ 95%RH
- Maximum and minimum temperature/humidity display
- Power
    - o   Receiver: 2 x AAA/LR03
    - o   Transmitter: 2 x AAA /LR06

WIRELESS REMOTE SENSOR (TRANSMITTER)

- Frequency 433.92 MHz
- Transmitter range: approx. 60m

FIRST CONSECRATION

- Do not place the wireless outdoor sensor on the ground or in direct sunlight. Do not place the sensor or weather station in a strong electromagnetic field.
- Open the battery compartment on the back of the outdoor sensor and insert the batteries. Make sure to observe the polarity.
  After inserting the batteries, all icons on the display will briefly light up and start detecting indoor and outdoor temperature and humidity.
- The receiver starts to establish a connection with the outdoor sensor. This operation takes about 3 minutes and is indicated by the flashing RF antenna symbol in the OUT area of the display.
- Once the receiver establishes a connection with the outdoor sensor, it enters radio time control mode.
